# Worksheet To Accompany the "Surface Area and Volume" Lesson 

This worksheet is intended for use with the lesson Surface Area and Volume.

For the following questions, use the rectangular prism:

1. What is the smallest volume that you can create with this prism?

What is the surface area associated with this volume? $\qquad$
What is the depth? $\qquad$
What is the height? $\qquad$
What is the width? $\qquad$
2. What is the largest volume that you can create with this prism? $\qquad$
What is the surface area associated with this volume? $\qquad$
What is the depth? $\qquad$
What is the height? $\qquad$
What is the width? $\qquad$
3. Explain why the surface area is larger than the volume in \#1.
