112 Jones Creek Place Chapel Hill, NC 27516  
Phone: 919 360 1289 Fax: N/A E-Mail: alexc@shodor.org

## Objective

I wish to continue learning about programming concepts and other areas of computers and I find that the best way to do this is to continue here at shodor by joining the Internship program. This will surely improve my skills with web design, general programming, and also teaching.

## Experience

### **Shodor Computational Science Foundation - Apprentice** **2013-Present**

- Here I have gained a lot of skills in computational science, web design and generally working with computers.

### **High School Model United Nations** **2012-Present**

- Despite not having won any awards, I have still done a lot of work here and it has greatly helped with skills such as public speaking and compromising with other people to find a solution that is beneficial for everyone

## Education

### **Chapel Hill High School** **2012-Present**

I am about to go in to my Junior at Chapel Hill. I do not focus on a specific subject because I am rather interested by just about every class I have enrolled in. Next year I plan on taking Computer Science which will also improve my skills with computer science.

### **McDougle Middle School** **2009-2011**

I had a pretty good time at McDougle, and this is when I first started getting interested in computers for programming rather than just for video games.

## Skills

Throughout my time here at shodor and classes that I have taken at school, I have developed many skills. These include a good understanding of PHP, HTML, CSS, and JavaScript. I have a pretty good grasp on good web design, which is apparent at my website: [shodor.org/~alexc](http://shodor.org/~alexc). I would recommend looking at this website because highlights many of the big projects that I have done here at Shodor.
