Final Website Design High Level Design (HLD) Document

1. Introduction

You have completed a slew of projects, and you now need a good way to present them. Create a website to display your projects along with a blog, and a brief introduction. This website will be shown to colleges, so you want it to look professional, but still be outstanding . The website should be intended for desktop use, but should be appealing on other platforms such as mobile and tablet.

2. Subject Matter Experts Agreement List

Name	Title/Role	Mandatory Reviewer (Y/N)	Approved
Apprentice name	Developer	Y	
Phil List	Supervisor	Y	
Eric Horton	Intern-apprentice wrangler	Y	
Mentor	Mentor	Y	

3. Requirements

- 5 pages: a home, a "about me", a portfolio, a blog, and a page of contact information.
- It should have a clearly visible title and logo so that the viewer is always aware of who's website they are on.
- A portfolio with all of your projects correctly linked in it
- A daily blog recounting what you have done and how it has helped you learn
- A consistent style so that the pages flow seamlessly in to each other
- There

4. Timeline

There is no set deadline, but this should be done by the end of summer. It would be a good idea to start sooner rather than later and continue to improve it as time goes on.

5. Desired Behavior / Components

The website should behave in a professional manner, and should flow neatly from page to page. The functions of the website should be clear and easy to comprehend.

    a. When someone clicks on a link, it should redirect them to the appropriate page

    b. There should be a button somewhere on the site which allows you to change the style of the page.

    c.

Replace the words in bold with your own words. Add more steps if you need them. Do this for each behavior of each agent.

6. Conclusion

The goal is this activity is to create a responsive and well designed website to present your work to a college or employer
